

CBBC China Now in Scotland Seminar Energy, Environment and Climate Change in China

Date: Thursday, 19th June 2008/ **Time:** 13:00 – 16:30

Venue: Scottish Enterprise, Apex House, 99 Haymarket Terrace, Edinburgh, EH12 5HD

China has attached increasing importance to the impact of Climate Change. Chinese government stated its plans for renewable energy generation to meet 15% of the country's growing energy needs by 2020. To achieve this goal, China is set to spend RMB2000 billion (over US\$200 billion) by 2020, which would make it the world's largest consumer of renewable energy.

Following on from CBBC's successful conference 'UK and China: Partners in Sustainability', this focused seminar will provide UK companies with an insight to the market situation and business opportunities in the energy and environment sectors in China. *Areas for discussion will include climate change, renewable energy, clean coal technology, environmental solutions and support for British companies seeking to work with Chinese partners in these areas.*

CBBC is delighted to confirm that Mr Gao Guangsheng, Director General of the Office of National Coordination Committee on Climate Change, China National Development and Reform Commission has agreed to be our keynote speaker at the event. Following his introductory remarks, Mr Gao will join a panel including speakers from industry and government for what we anticipate to be a very informative and interactive session. The seminar will be chaired by Mr Stephen Philips, CEO of CBBC.
